

“ Here’s what past program participants had to say about the experience. ”

So far this summer has been a great experience for me. As I begin my last year at college, I’m grateful for learning everything I have from UPS; this experience will definitely benefit my future.

Mim C

I learned so much and gained a strong background with some new technologies. So, thank you again, I have really enjoyed my time working at UPS and I would definitely love an opportunity to work here in the future.

Nick L

...New interns for the years to come will have a great and enjoyable experience as an Intern for UPS. The whole process was really cool, and it was awesome to see the different projects that other people have worked on. The intern group this year seemed really strong and innovative.

Elliot F

First, let me begin by thanking you for giving me the opportunity to work at UPS. I feel like I’ve learned a lot about computers, business and pretty much everything else from working here. I also think I’ve made many lifelong friends from my time working here.

Amy H

INTERNS and CO-OPS

2017 UPS Technology Intern Program

UPS Information Technology, a global leader in information technology, is seeking college students to join our team at our Georgia, Kentucky, Maryland and New Jersey locations.

Join our technology team!

UPS is an equal opportunity employer – race/color/religion/sex/national origin/veteran/disability

Why Choose a UPS Internship?

An experience like no other! Our interns and co-ops develop invaluable team-building, communications, and technology skills with the help of UPS mentors, and are given assignments that have real impact on our company. You'll have a chance to network with experienced I.T. professionals and your fellow students during events throughout the year. Take a tour of one of our data centers or operations hubs to see first-hand how our advanced technology integrates with our business operations. Join one of our cultural celebrations, or take advantage of an opportunity to volunteer in the local community.

Join UPS, and you'll be doing meaningful work with one of the most respected and innovative I.T. employers in its industry.

The UPS I.T. Internship Program

The UPS Internship Program provides the mentoring and learning opportunities you need to help you develop your skills, network with UPS technology professionals, and learn more about what it's like to work in one of the world's most advanced and fast-paced technological environments.

What's In It for You?

Professional Development: You'll develop team-building, communications, and valuable networking skills, as seasoned UPS mentors are there to answer your questions and guide you through your work – all skill building opportunities that will supplement your classroom work and add to your resumé.

Data Center Tours & Technology Showcase:

You'll experience the inner-workings of a real, world-class Tier 4 data center, and also participate in a Technology Showcase of UPS projects to see first-hand how we use our innovation and expertise to develop next generation technologies that support our business.

Networking Opportunities: You'll take advantage of many opportunities to network with, and learn and grow from fellow interns and UPS I.T. pros.

If you are a highly motivated college student working on a degree in **Computer Science, Management Information Systems (MIS), or a related degree**, then **UPS is a great place for you to start your career.**
